Installation

Download the latest JAR file

Version 1.0 of the Security Consultant Assignment/Engagement Tracking System (SCATS) can be downloaded from the [Cygienne Solutions](http://cygienesolutions.com) website.

The Security Consultants Assignment/Engagement Tracking system (SCATS) is a stand-alone application makes it easy to manage security consultants and their qualifications and certifications. The SCATS system centralizes the effort of scheduling and tracking security engagements, their status, and fieldwork documentation produced throughout the engagement process.

The SCATS application can be downloaded here: [SCATS v1.0](http://cygienesolutions.com/scats/SCATSv1.0)
